Ryan Vogt, Executive Director, Oregon Cascades West Council of Governments

About the Institute for Policy Research and Engagement

The Institute for Policy Research & Engagement (IPRE) is a research center affiliated with the School of Planning, Public Policy, and Management at the University of Oregon. It is an interdisciplinary organization that assists Oregon communities by providing planning and technical assistance to help solve local issues and improve the quality of life for Oregon residents. The role of IPRE is to link the skills, expertise, and innovation of higher education with the transportation, economic development, and environmental needs of communities and regions in the State of Oregon, thereby providing service to Oregon and learning opportunities to the students involved.
We would like to thank the following individuals and organizations who provided input and feedback throughout the 2020 CEDS update process.

**Cascades West Economic Development District Board Members**

- **Pat Malone**  County Commissioner  Benton County
- **Biff Traber**  Mayor  City of Corvallis
- **Claire Hall**  County Commissioner  Lincoln County
- **Jim Lepin**  Mayor  City of Millersburg
- **Karun Virtue**  City Councilor  City of Waldport
- **Sharon Konopa**  Mayor  City of Albany
- **Paul Schuytema**  Executive Director  Economic Development Alliance of Lincoln Co
- **Chris Workman**  City Manager  City of Philomath
- **Kelly Hart**  Community Development Director  City of Lebanon
- **John Pascone**  President  Albany-Millersburg Economic Development Corp
- **Pam Barlow-Lind**  Tribal Planner  Confederated Tribes of Siletz Indians
- **Kate Porsche**  Economic Development  City of Corvallis
- **Chris Pryor**  City Councilor  City of Eugene
- **Greg James,**  Board Member  Willamalane Parks and Recreation District
- **Heather Buch**  County Commissioner  Lane County
- **Mary Walston**  Board Member  Eugene 4J School District
- **Sonya Carlson**  Board Member  Eugene Water and Electric Board
- **Tom Cotter**  City Councilor  City of Veneta
- **Greg Ervin**  City Councilor  City of Cottage Grove
- **Matt Michael**  City Manager  City of Veneta

**CEDS Update Working Group Contributors**

Overview

CWEDD is designated by the U.S. Department of Commerce Economic Development Administration (EDA) to work on economic development efforts in, Benton, Lane, Lincoln, and Linn Counties. CWEDD advocates for, supports, and coordinates regionally significant economic development activities in the region.

This regional CEDS will benefit the Cascades West region in two primary ways:

1. The CEDS highlights key priorities for the region in the next five years.
2. The CEDS identifies strategic priorities that have regional significance.

Spotlight on Economic Resilience

What is Economic Resilience?

- The ability to recover quickly from a shock
- The ability to withstand a shock
- The ability to avoid the shock altogether

The challenges we’ve confronted in 2020 have prompted rapid change and adaptation. Resilience is woven throughout this CEDS in the hopes that the next time we face wide-ranging shocks like those experienced in 2020, we’ll have better tools and systems for avoiding, withstanding, and quickly recovering from disruption.

Six principles have guided decisions about CWEDD’s 2020 CEDS strategic priorities, implementation structure, and performance indicators.

What is a CEDS?

The Comprehensive Economic Development Strategy (CEDS) contributes to effective economic development in America’s communities and regions through a locally-based, regionally-driven economic development planning process.

The CEDS provides the capacity-building foundation by which the public sector, working in conjunction with other economic actors (individuals, firms, industries), creates the environment for regional economic prosperity.

-US Economic Development Administration
District Profile

Historically, the ocean, agricultural lands, and forest lands provided a variety of harvesting, processing, and secondary processing opportunities for the region. During the 1980s, many of the region’s natural resource-based businesses faced significant structural changes and began contracting. This shift in the region’s employment opportunities has particularly impacted our rural areas.

Benton County

| Population | 94,665 |
| Area | 676 sq. mi. |
| Median Household Income | $58,655 |
| County Seat | Corvallis |

Lane County

| Population | 381,365 |
| Area | 4,554 sq. mi. |
| Median Household Income | $49,958 |
| County Seat | Eugene |

Lincoln County

| Population | 48,305 |
| Area | 980 sq. mi. |
| Median Household Income | $46,061 |
| County Seat | Newport |

Linn County

| Population | 127,320 |
| Area | 2,291 sq. mi. |
| Median Household Income | $52,097 |
| County Seat | Albany |

Strategic Priorities

Vision

The District’s preferred future includes a growing diversified and resilient economy with a range of employment opportunities that provide stable family wage jobs, lifelong learning and training opportunities, sustainable natural resources, an integrated infrastructure, and coordination among economic development efforts throughout the region.

- Each Priority Area contains several ideas for approaches and implementation. These options are a jumping off point rather than a checklist.

- Economic development practitioners and their partners, with support from CWEDD staff as capacity allows, will implement the CEDS – implementation will be a collaborative effort across many organizations.

- It is not expected that economic development practitioners will pursue all the ideas captured in this CEDS.

- Instead, economic development practitioners and their partners should work together during annual convenings organized by CWEDD to identify which approaches they want to pursue based on the assets and strengths they are able to contribute.
Description: A regional economic development strategy is most effective when it considers and incorporates the interests and strengths of all jurisdictions in the region. By leveraging the strengths and capabilities of each county towards a wider economic strategy, the region can become more prosperous, resilient, and cohesive.

CWEDD’s Role: As a regional coordinating body, the District is well positioned to facilitate collaboration. Over the next five years, the District will foster cross-regional relationships and seek to align efforts around regionally significant projects.

Key Partners
- Economic development staff across the region
- CWEDD Board
- Business Oregon
- Regional Solutions
- University of Oregon EDA University Center

Indicators

Collaboration: Presence of cross- and multi-jurisdictional economic development projects

Equity & Inclusion: Representativeness of CWEDD Board & Working Groups

Resilience: Incorporation of resilience considerations into regional and local economic development strategies
Description: Our region’s businesses are the beating heart of our economy. To thrive, the region must support and retain existing businesses while also cultivating new businesses that will help diversify our economy and generate job growth. With macro-level economic changes – from globalization to shifting market structures – the regional economy will require a continued influx of fresh energy from new and existing businesses.

CWEDD’s Role: The District has an opportunity to offer resources and coordination that will support local-level business retention and expansion efforts and entrepreneurial ecosystems builders. Over the next five years, the District will provide research capacity, serve as an information hub, and facilitate important connections between business support providers.

Key Partners
- Economic development staff
- Small Business Development Centers
- Oregon RAIN
- Chambers and other business associations

Indicators
- Collaboration: Presence of referrals between business support providers
- Equity & Inclusion: Representativeness of business owner demographics
- Resilience: Presence of continuity of operations plans
**Priority Area 3: Infrastructure Resilience**

**Description:** Large infrastructure projects, particularly those of regional significance, often exceed the capacity and technical expertise of local municipalities. Further, they often involve multiple partners, public-private partnerships, complex regulatory systems, and strategic stakeholder engagement. To effectively achieve needed infrastructure improvements in the region, technical support will be required.

**CWEDD’s Role:** The District is uniquely positioned to support regional infrastructure projects. **Over the next five years,** the District will provide technical assistance and connect specific projects with other resources (e.g., Regional Solutions Teams, University-based programs, state and federal agency partners, etc.).

---

**Key Partners**
- Economic development staff
- Business Oregon Infrastructure Finance Authority
- Local & county emergency managers

**Indicators**

**Collaboration:** Presence of cross- or multi-jurisdictional infrastructure projects

**Equity & Inclusion:** Presence of projects explicitly considering equity

**Resilience:** Presence of projects explicitly considering resilience and redundancy
Priority Area 4: Workforce Support

Description: Many businesses in the region report that they are struggling to find qualified employees for a range of skilled, semi-skilled, and unskilled positions, in part because of training, and in part because of livability factors like lack of affordable housing options. There is also an ongoing need to support existing workforce training efforts and to coordinate and align the efforts of the various Workforce Investment Boards (WIBs) in the region.

CWEDD’s Role: Over the next five years, the District will help link education, training, apprenticeships, and career planning to the employment needs of existing and emerging business sectors. The District will also advocate for policies that will help enhance workers’ quality of life.

Key Partners
- Economic development staff
- Workforce Investment Boards
- K-12 & higher education representatives
- Local & county planning staff

Indicators

Collaboration: Level of coordination between EDOs and WIBs

Equity & Inclusion: Percentage of cost-burdened households

Resilience: Level of coordination between education/worker-training programs and businesses
Description: Rural communities have unique economic strengths and challenges. While training and educational opportunities exist in the region, distance and other challenges can prevent rural communities from accessing those services. Lack of basic services can make rural areas less attractive to prospective residents and employers. Therefore, ensuring equitable access to basic services for residents and businesses in rural areas is a critical strategic opportunity.

CWEDD’s Role: As a regional body that can work with Counties and other districts that cover unincorporated areas and smaller towns, the District plays an important role in directing resources towards rural areas. Over the next five years, the District will advocate for high-quality service provision to rural areas and support projects that enhance economic opportunity and resilience in rural communities.

Priority Area 5: Rural Vitality

Key Partners
- Economic development staff
- Regional tourism staff
- Rural school districts and education service districts
- Health care providers
- Local & county emergency managers

Indicators
- Collaboration: Presence of multi-jurisdictional projects in rural areas
- Equity & Inclusion: Access to health and education services
- Resilience: Presence of rural infrastructure projects explicitly considering self-sufficiency
# Implementation

## Who Implements the CEDs & How? | Key Roles & Descriptions

### CWEDD Organization

<table>
<thead>
<tr>
<th>Decision-making</th>
<th>CWEDD Board</th>
</tr>
</thead>
<tbody>
<tr>
<td>Decision-making body that approves regional priorities through adoption of CEDS. The CWEDD Board will provide direction to CWEDD staff as appropriate.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Convening &amp; Coordination</th>
<th>CWEDD Staff</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conduit between decision-makers (the Board) and economic development staff. CWEDD staff will convene regional and local stakeholders through CEDS implementation meetings and provide support through outreach, facilitation aid, and relevant economic development opportunities to the region.</td>
<td></td>
</tr>
</tbody>
</table>

### Regional and Local Economic Development Stakeholders

- **Benton, Lincoln, and Linn County Economic Development Group**
  - Benton, Lincoln, and Linn County Economic Development group serves the local priorities of Benton, Lincoln, and Linn Counties. They will provide local updates during CEDS implementation meetings to support local alignment with regional priorities.

- **Lane Economic Committee**
  - Lane Economic Committee (LEC) serves as an economic development advisory group to LCOG. This group will provide local updates during CEDS implementation meetings to support local alignment with regional priorities.

- **Additional Practitioners and Stakeholders**
  - Additional regional and local practitioners and stakeholders may include representatives from statewide organizations, economic development organizations, business leaders, and entrepreneurs, among others. In response to the Pandemic, important cross-region coordinating groups emerged that should be leveraged in CEDS implementation. Groups like these and other individuals should provide updates on their work and add their perspective to CEDS implementation meetings.

### Working Groups

- **Working Groups**
  - Working Groups will be formed during CEDS implementation meetings and be the action-oriented and project-focused groups that carry out regional priorities. They will be convened by a Project Champion identified from within the group. If no Champion emerges, the project should be tabled.
### Timeline

Priority Area Layout

Priority Area Title

Priority Area Description

Approaches
Approaches that should guide economic development in the CWEDD region

Implementation Ideas
Ideas for how economic development practitioners can execute the strategies

Priority Area 2: Sector Diversification Through Business Development

Description: Our region’s businesses are the beating heart of our economy. In order to thrive, the region must support and retain existing businesses while also cultivating new businesses. It will be critical to respond to macro-level economic changes—from globalization to shifting market structures—the region’s economy will require a continued influx of fresh energy from new and existing businesses.

CWEDD’s Role: The District has an opportunity to offer resources and coordination that will support local-level business retention and expansion efforts and entrepreneurial ecosystem builders. Over the next five years, the District will provide research capacity, serve as an information hub, and facilitate important connections between business support providers.

Approaches
What will guide regional economic development?

- Business development and business retention and expansion efforts by serving as a clearing house for regional data and resources.

Implementation Ideas
How can the strategies be implemented?

- Create and promote a database of incubators, accelerators, capital sources, and business support services available in the region.
- Assist with identifying and pursuing funding that would increase capacity of business incubators and accelerators.
- Establish a network of local and regional navigators to help businesses through permitting and other processes.
- Regional businesses interested in international trade on the advantages of exporting their goods and services.
- Facilitate annual meetings with representatives from business development centers and incubators/accelerators to discuss the process referrals between support providers.
- Facilitate annual meetings with representatives from educational institutions to build connections between regional needs and academic course offerings.
- Organize a forum on regional innovation networking.

Indicators
Factors we can measure to understand progress in the strategic priority

Key Partners
Groups who should be engaged in projects related to the strategies

Key Considerations
Explanations of how Regional Collaboration, Equity & Inclusion, and Resilience integrate with the strategic priority
## Priority Area 1: Regional Collaboration & Partnerships

**Description:** A regional economic development strategy is most effective when it considers and incorporates the interests and strengths of all jurisdictions in the region. By leveraging the strengths and capabilities of each county towards a wider economic strategy, the region can become more prosperous, resilient, and cohesive.

**CWEDD’s Role:** As a regional coordinating body, the District is well positioned to facilitate collaboration. **Over the next five years,** the District will foster cross-regional relationships and seek to align efforts around regionally significant projects.

### Approaches
*What will guide regional economic development?*

| Build relationships and collaboration through project-based regional initiatives. |
| Integrate the priorities captured in the CEDS into existing local- and regional-scale initiatives. |
| Increase CWEDD’s staff capacity so CWEDD can provide more support to regional initiatives. |
| Increase representation of currently underrepresented business, workforce, and education interests on the CWEDD Board and CEDS project working groups by including more perspectives from Tribes, Latino/a/x communities, Black communities, immigrant communities, rural communities, and low-income communities. |

### Implementation Ideas
*How can the strategies be implemented?*

<p>| Convene economic development practitioners from across the region quarterly or semi-annually to brainstorm, revise, and prioritize a list of regionally significant projects. |
| Economic development practitioners who are familiar with the CEDS should engage economic development practitioners who are new to the region or the CEDS in a CEDS overview.onboarding process. |
| City and County economic development staff should deliver an annual CEDS overview and update to elected officials. |
| Seek funding to add at least 1 Full Time Equivalent (FTE) staff support position to CWEDD. |
| Create a regional economic development organization chart that clearly identifies the linkages and roles of all economic development agencies in the CWEDD region (house on CWEDD website). |
| Review CWEDD Board representation and recruit new members that can speak to the perspectives of underrepresented groups, including but not limited to: Tribes, Latino/a/x communities, Black communities, immigrant communities, rural communities, and low-income communities. |</p>

<td>Foster a coordinated approach to economic resilience and recovery planning efforts across the region.</td>
<td>Develop local recovery ordinance model language that jurisdictions can adopt.</td>
</tr>
</tbody>
</table>
Priority Area 1: Regional Collaboration & Partnerships, cont.

Indicators

**Collaboration**: Presence of cross- and multi-jurisdictional economic development projects

**Equity & Inclusion**: Representativeness of CWEDD Board & Working Groups

**Resilience**: Incorporation of resilience considerations into regional and local economic development strategies

Key Partners

- Economic development staff across the region
- CWEDD Board
- Business Oregon
- Regional Solutions
- University of Oregon EDA University Center

Key Considerations

**Equity & Inclusion**

*How will these strategies build a more equitable and inclusive region?*

**Representation** – by including and involving a more representative set of perspectives from the communities served by CWEDD in CWEDD committees and initiatives, economic development projects have a better chance of meeting the needs of everyone in our region, not just those who traditionally held the most power and influence over decision-making and resource allocation.

**Resilience**

*How will these strategies build regional resilience?*

**Internal Coordination** – economic development efforts in the CWEDD region have not been well coordinated in the past, leading to missed opportunities for collective impact. When we begin to align our efforts, collaborating around resources rather than competing over them, we can spread the benefits of economic development more broadly, building a region that is less vulnerable to economic downturns.

**External Communication** – lack of internal coordination leads to confusing, ineffective communication to businesses and workers. Increasing collaboration among economic development supporters will foster a more unified, streamlined message to the business community and our workforce, aiding our ability to respond quickly and effectively to economic crises.
## Priority Area 2: Sector Diversification Through Business Development

### Description:
Our region’s businesses are the beating heart of our economy. In order to thrive, the region must support and retain existing businesses while also cultivating new businesses that will help diversify our economy and generate job growth. With macro-level economic changes – from globalization to shifting market structures – the regional economy will require a continued influx of fresh energy from new and existing businesses.

### CWEDD’s Role:
The District has an opportunity to offer resources and coordination that will support local-level business retention and expansion efforts and entrepreneurial ecosystems builders. **Over the next five years**, the District will provide research capacity, serve as an information hub, and facilitate important connections between business support providers.

### Approaches

**What will guide regional economic development?**

- Provide support to entrepreneurship and business retention and expansion efforts by serving as a clearing house for regional data and resources.
- Facilitate connections between business development centers and business incubators and accelerators to create an obvious bridge of support between the start-up and growth phases of new businesses.
- Facilitate connections between educational institutions (both K-12 and higher education) and business incubators and accelerators to foster a culture of entrepreneurship.

### Implementation Ideas

**How can the strategies be implemented?**

- Create and promote a database of incubators, accelerators, capital sources, and business support services available in the region.
- Assist with identifying and pursuing funding that would increase capacity of business incubators and accelerators.
- Develop a business registration or tracking system that will allow the collection of more and better data about businesses’ needs.
- Establish a network of local and regional staff who can help businesses navigate through permitting and other processes.
- Develop and publicize educational opportunities about the advantages of international trade for regional businesses that are interested in expanding into new markets.
- Facilitate annual meetings with representatives from business development centers and incubators/accelerators to discuss the process referrals between support providers.
- Facilitate annual meetings with representatives from educational institutions to build connections between regional needs and academic course offerings.
- Organize a forum on regional innovation networking.

<table>
<thead>
<tr>
<th>Approaches, cont.</th>
<th>Implementation Ideas, cont.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>What will guide regional economic development?</strong></td>
<td><strong>How can the strategies be implemented?</strong></td>
</tr>
<tr>
<td>Work to ensure that the demographics of business owners and entrepreneurs are representative of the race and gender distributions in the region.</td>
<td>Assess the demographic distribution of business owners and entrepreneurs who are accessing services and develop or support programs specifically targeted to demographic groups that are underrepresented. Intentionally seek out grassroots efforts that may already be occurring to support these businesses and offer to collaborate.</td>
</tr>
<tr>
<td>Provide start-ups and existing businesses with resources and incentives to develop, test, and implement continuity of operations plans.</td>
<td>Work with Small Business Development Centers (SBDCs), incubators, and accelerators to develop low-effort business continuity of operations planning resources. Discuss potential shocks, threats, disasters and risk reduction strategies at local chamber or business association “Lunch and Learn” events to encourage businesses to create continuity of operations plans. Incentivize investments in business resilience for businesses that have business continuity plans (e.g. reduce business license fees; 1% reduction in property taxes (or other tax) for businesses that have an employee preparedness training program; expedite plan review for hazard retrofit/mitigation projects).</td>
</tr>
<tr>
<td>Develop emergency recovery revolving loan funds and other creative financing options before shocks so that businesses can immediately access financial assistance post-shock.</td>
<td>Utilize external funding (such as the FEMA Hazard Mitigation Grant Program and Community Development Block Grants) to leverage local funds for business-related mitigation activities.</td>
</tr>
</tbody>
</table>
Priority Area 2: Sector Diversification Through Business Development

### Indicators

**Collaboration:** Presence of referrals between business support providers

**Equity & Inclusion:** Representativeness of business owner demographics

**Resilience:** Presence of continuity of operations plans

### Key Partners

- Economic development staff
- Small Business Development Centers
- Oregon RAIN
- Chambers and other business associations

### Regional Collaboration

**How will a regional approach to these strategies support economic prosperity?**

Coordinated industry cluster development requires teamwork. Businesses within a cluster have supply chains and relationships that cross jurisdictional boundaries. Business development support is therefore most effective when it acknowledges the interconnected nature of industry clusters. Economic developers must work together across jurisdictional lines to support a regional business environment that supports the growth and expansion of key industries.

### Equity & Inclusion

**How will these strategies build a more equitable and inclusive region?**

**Access for existing businesses** – barriers to entry and promotion in business have been higher for some demographic groups than others, resulting in business ownership and leadership that is not representative of the general population. Programs and policies targeted at supporting groups that are underrepresented in business ownership and leadership will help bring representation back into balance.

**Access for entrepreneurs** – start-ups require significant upfront resources and are more likely to gain traction if the entrepreneurs can leverage relevant social and investor networks. Some demographic groups and entrepreneurs in rural areas may have more limited access to resources and networks. When economic developers work specifically to assist underrepresented groups, they create a more representative pipeline of new business owners.

### Resilience

**How will these strategies build regional resilience?**

**Diversification of industries** – encouraging business growth, particularly growth into new sectors, will help the region weather shocks by ensuring the region does not have “all of its eggs in one basket.”

**Pre-disaster planning for response & continuity** – encouraging and supporting the development of continuity of operations plans for businesses will better prepare businesses to withstand shocks.

**Internal Coordination** – facilitating connections between incubators, accelerators, and traditional business development support providers will lead to a better alignment of resources.

---

3 In 2018, 11% of Oregon’s small businesses (businesses with fewer than 500 employees, which make up 99.4% of all Oregon businesses) were minority-owned, according to the 2018 Small Business Profile from the US Small Business Administration. In 2019, 25% of Oregon’s population was not white alone and not Hispanic or Latino (American Community Survey, 2019: ACS 1-Year Estimates Data, Table DP05).
Priority Area 3: Infrastructure Resilience

**Description:** Large infrastructure projects, particularly those of regional significance, often exceed the capacity and technical expertise of local municipalities. Further, they often involve multiple partners, public-private partnerships, complex regulatory systems, and strategic stakeholder engagement. In order to effectively achieve needed infrastructure improvements in the region, technical support will be required.

**CWEDD’s Role:** The District is uniquely positioned to support regional infrastructure projects. **Over the next five years,** the District will provide technical assistance and connect specific projects with other resources (e.g. Regional Solutions Teams, University-based programs, state and federal agency partners, etc.).

### Approaches

Priority Area 3: Infrastructure Resilience, cont.

### Indicators

<table>
<thead>
<tr>
<th>Collaboration: Presence of cross- or multi-jurisdictional infrastructure projects</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity &amp; Inclusion: Presence of projects explicitly considering equity</td>
</tr>
<tr>
<td>Resilience: Presence of projects explicitly considering resilience and redundancy</td>
</tr>
</tbody>
</table>

### Key Partners

- Economic development staff
- Business Oregon Infrastructure Finance Authority
- Local & county emergency managers

### Regional Collaboration

**How will a regional approach to these strategies support economic prosperity?**

Although many infrastructure projects occur at a local scale, it is always important to consider regional connections, particularly when planning for diversity and redundancy. By keeping a finger on the pulse of many local projects, economic development practitioners can encourage regional considerations during conversations about infrastructure development.

### Equity & Inclusion

**How will these strategies build a more equitable and inclusive region?**

*Access* – research shows that lower-income communities and communities of color are disproportionately impacted by the negative externalities of infrastructure development (like pollution from industrial development and displacement by highway construction), while these same communities don’t always see the full benefits of projects.\(^4\) Considering equity during the planning process for infrastructure projects can help mitigate these trends. It is also important to remember that equitable benefit is different than equal benefit – to address past discrimination and lack of access, some projects will require more investment in some communities compared to others.

### Resilience

**How will these strategies build regional resilience?**

*Infrastructure redundancy and resiliency* – focusing on projects that create redundant infrastructure (back-up systems that will take over if the primary system fails) and resilient infrastructure (systems that can withstand disruption for either natural or human-created incidents) will put CWEDD in a strong position to bounce back quickly from disruption.

*Equitable access* – developing broadband and other critical infrastructure in underserved communities will uplift areas that have suffered economically because they lacked access to high-quality essential services.

*Internal Coordination* – working collectively across the region to identify important projects will ensure a more coordinated and collaborative approach to seeking funding.

---

Priority Area 4: Workforce Support

**Description:** Many businesses in the region report that they are struggling to find qualified employees for a range of skilled, semi-skilled, and unskilled positions, in part because of training, and in part because of livability factors like lack of affordable housing options. There is also an ongoing need to support existing workforce training efforts and to coordinate and align the efforts of the various Workforce Investment Boards (WIBs) in the region.

**CWEDD’s Role:** Over the next five years, the District will help link education, training, apprenticeships, and career planning to the employment needs of existing and emerging business sectors. The District will also advocate for policies that will help enhance workers’ quality of life.

### Approaches

**What will guide regional economic development?**

<table>
<thead>
<tr>
<th>Support deliberate coordination between businesses, Workforce Investment Boards (WIBs), and educational institutions to help identify and provide for current employer needs.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attract and retain younger talent by promoting the region’s livability and access to exceptional nature and outdoor recreation opportunities.</td>
</tr>
<tr>
<td>Investigate and support policies and projects that will increase the availability of affordable housing, affordable transportation options, the quality and accessibility of recreation, access to broadband, access to healthcare, and other factors that enhance quality of life.</td>
</tr>
</tbody>
</table>

### Implementation Ideas

**How can the strategies be implemented?**

<table>
<thead>
<tr>
<th>Facilitate annual meetings between representatives from educational institutions, WIBs, and key business sectors to (1) identify current and predicted workforce skill needs and (2) consider curriculum changes that will support the development of these skills.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Partner with local workforce development programs, including WIBs, to increase participation of local businesses in apprenticeships, internships and On-The-Job-Training programs, in order to build pathways to employment for persons entering the workforce.</td>
</tr>
<tr>
<td>Work with Destination Marketing Organizations to prepare marketing material specifically geared towards attracting new workers to the area and demonstrating the region’s benefits to recent graduates.</td>
</tr>
<tr>
<td>Encourage practitioners to participate in discussions at the local and county levels related to affordable housing, transportation, recreation, and healthcare access – ask to have representation for economic development practitioners and business representatives on committees and working groups.</td>
</tr>
<tr>
<td>Work with statewide economic development groups like the Oregon Economic Development Association (OEDA) and Oregon’s Economic Development Districts (OEDD) to have a state and national lobbying presence advocating for policies that will increase the availability of and access to affordable housing, transportation, recreation, health care, and broadband.</td>
</tr>
</tbody>
</table>
## Priority Area 4: Workforce Support, cont.

<table>

<td>❖ K-12 &amp; higher education representatives</td>
</tr>
<tr>
<td></td>
<td>❖ Local &amp; county planning staff</td>
</tr>
</tbody>
</table>

### Regional Collaboration

**How will a regional approach to these strategies support economic prosperity?**

Workforce Investment Boards (WIBs) are critical economic development partners. The CWEDD region overlaps with three different WIBs, making regional coordination particularly important. CWEDD can play a role in aligning the efforts of our region’s WIBs with the needs of our businesses and the capacity of our educational institutions.

### Equity & Inclusion

**How will these strategies build a more equitable and inclusive region?**

**Access** — many residents in the CWEDD region struggle to stay afloat amid high living costs. With economic inequality on the rise, CWEDD must support efforts to ensure residents have options for earning a living wage and affordable access to housing, transportation, recreation, broadband, and health care. Making headway on these issues will play a key role in reducing economic inequality.

### Resilience

**How will these strategies build regional resilience?**

**Workforce flexibility** — pushing for more strategic connections between our workforce development sector and our educational institutions will help better align the skills of our workers with the needs of our businesses. By better aligning efforts, we give our workforce an appropriate and transferrable skill that will allow the region to pivot quickly into new sectors as our economy adapts to new technology and consumer demands.

**Equitable access** — supporting policies that ensure basic needs are met (like access to affordable housing and high-speed internet) removes stressors from the lives of our workers, allowing them to focus their energy on contributing to our region’s businesses.

**Internal Coordination** — in part because of the mis-aligned geographies of WIBs and EDDs, our region has sometimes struggled to coordinate efforts related to workforce development. By intentionally focusing on building stronger coordination between WIBs and other economic development practitioners, we can create a more coherent system of support for our region’s workforce.

---

## Priority Area 5: Rural Vitality

**Description:** Rural communities have unique economic strengths and challenges. While training and educational opportunities exist in the region, distance and other challenges can prevent rural communities from accessing those services. Lack of basic services can make rural areas less attractive to prospective residents and employers. Therefore, ensuring equitable access to basic services for residents and businesses in rural areas is a critical strategic opportunity.

**CWEDD’s Role:** As a regional body that can work with Counties and other districts that cover unincorporated areas and smaller towns, the District plays an important role in directing resources towards rural areas. **Over the next five years,** the District will advocate for high-quality service provision to rural areas and support projects that enhance economic opportunity and resilience in rural communities.

### Approaches

**What will guide regional economic development?**

<table>
<thead>
<tr>
<th>Prioritize strategies that support the growth of tourism and value-added natural resource industries (including ecotourism, marine-related activities, sustainable farming, and local food and beverage production) to enhance economic opportunities in rural areas.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Support efforts to provide high-quality K-12 education in rural areas.</td>
</tr>
<tr>
<td>Support efforts to increase health care and telehealth care access in rural areas.</td>
</tr>
<tr>
<td>Emphasize infrastructure self-sufficiency in rural areas to ensure communities can sustain themselves in the event a disaster cuts off access to transportation systems and urban centers.</td>
</tr>
</tbody>
</table>

### Implementation Ideas

**How can the strategies be implemented?**

| Work with local Main Street programs to identify and secure funding for downtown revitalization projects. |
| Work with Destination Marketing Organizations and the Willamette Valley Visitors Association to develop and market local value-added products. |
| Develop/sustain business retention and expansion programs in rural communities with a particular emphasis on succession planning for businesses at risk of closing. |
| Meet regularly with K-12 school administrators and Education Service District representatives to understand students’ needs and lend support to projects aimed at meeting these needs. |
| Meet regularly with health care providers and public health officials to understand rural patients’ needs and lend support to projects aimed at meeting these needs. |
| Develop a self-sufficiency checklist to apply during project planning; the checklist can help identify project shortcomings and encourage modifications that will ensure rural areas can sustain themselves without outside help. |
### Priority Area 5: Rural Vitality, cont.

#### Indicators

<table>
<thead>
<tr>
<th>Collaboration: Presence of multi-jurisdictional projects in rural areas</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity &amp; Inclusion: Access to health and education services</td>
</tr>
<tr>
<td>Resilience: Presence of rural infrastructure projects explicitly considering self-sufficiency</td>
</tr>
</tbody>
</table>

#### Key Partners

- Economic development staff
- Regional tourism staff
- Rural school districts and education service districts
- Health care providers
- Local & county emergency managers

#### Regional Collaboration

**How will a regional approach to these strategies support economic prosperity?**

Our region’s rural areas must work together to increase access to basic services and cultivate promising new economic sectors. While each community has unique needs and identities, far more unites our rural areas than divides them. County and other regional economic development practitioners should facilitate collaboration and sharing among rural communities. This will help coalesce multiple communities behind funding proposals and projects, increasing the likelihood of their success.

#### Equity & Inclusion

**How will these strategies build a more equitable and inclusive region?**

**Access** – many public services are concentrated in urban areas, making them difficult to access for residents of rural areas who do not have reliable transportation or high-speed internet connections. By highlighting the needs of rural residents and advocating for systems of service provision that are accessible in rural areas, economic developers can bring attention and resources to an underserved population.

#### Resilience

**How will these strategies build regional resilience?**

**Diversification of industries/economic sectors** – Oregon’s rural economies have experienced significant decline in part because they lacked economic diversity. Encouraging the diversification of the industries that support our rural areas will increase rural areas’ ability to withstand and bounce back from future economic shocks.

**Infrastructure redundancy and resiliency** – building out self-sufficient infrastructure in rural places will decrease dependency on far-away support systems. Since many disasters may cut off access to these support systems, self-sufficient and back-up infrastructure will be critical to survival.

**Internal Coordination** – coalescing rural communities around specific funding proposals will increase competitiveness since many funders prioritize collaborative efforts. While a single community on its own may have trouble competing with the comparatively vast resources available in urban areas, pooling rural communities’ resources and voices will increase their likelihood of gaining attention and traction.
